Under the leadership of Artistic Director Wendy Martin, Perth Festival has committed to presenting work by the world's leading artists with disability. This commitment addresses a core value of the Festival's artistic vision to celebrate difference and develop diverse audiences.

In partnership with DADAA, Perth Festival will champion accessibility for artists and audiences. # AUDIO DESCRIBED & TACTILE TOUR PERFORMANCES

Audio Described performances provide people with vision impairment live commentary of the visual elements of a performance via a personal headset.

They will describe information such as facial expressions, costume, scenery and action sequences without intruding on the actors' dialogue. Patrons utilising the service are advised to arrive at the venue at least 20 minutes prior to the performance to collect their equipment from the Front of House and be comfortably seated. The commentary will commence 10 minutes prior to the performance.

If you would like to take advantage of the Audio Description service, please let us know when booking to reserve your headset.

Tactile tours may also be provided as part of the Audio Description service. The guided tour is conducted prior to the performance and gives patrons with vision impairment an opportunity to be escorted onto the set and handle a selection of costumes and props. During the tour, the audio describers will describe the items being introduced and how they will feature in the performance.

Tactile tours are free but should be booked in advance.

In a captioned performance the dialogue and sound effects are converted into text and displayed on portable devices such as phones or tablets. This service is designed for patrons who are deaf or have a hearing impairment or for those who have difficulty following strong accents.

Perth Festival in partnership with the Captioning Studio uses the app GoTheatrical! The app enables patrons to access closed captions on their mobile and tablet devices. Specifically designed for theatre lighting conditions, patrons seated nearby are not distracted by the technology.

The app is available from The App Store and GooglePlay.
